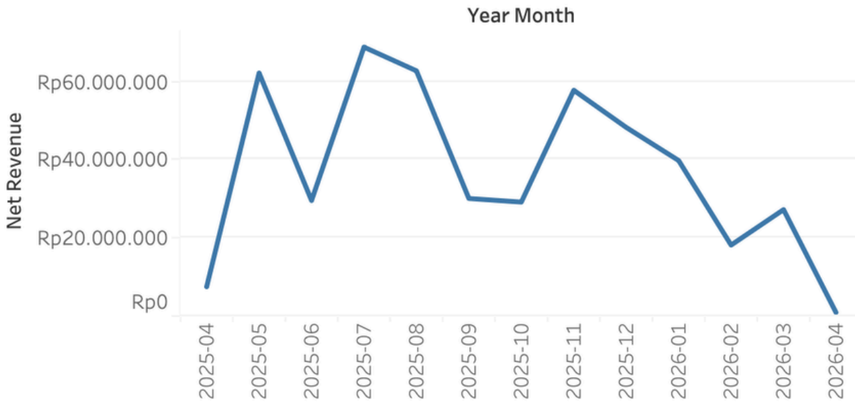
TikTok Shop Sales Performance Analysis

April 2025-April 2026

615M	482M	12,924	21.3%
Gross Value	Net Value	Clothes Sold	Cancel Rate

Net Revenue Trend (Apr 2025-April2026)

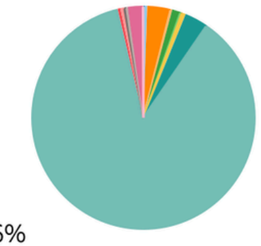


Sales fluctuated over time, with noticeable peaks and drop across the period.

Top Revenue by Region

East Java (Jawa Timur) contributes the highest revenue.

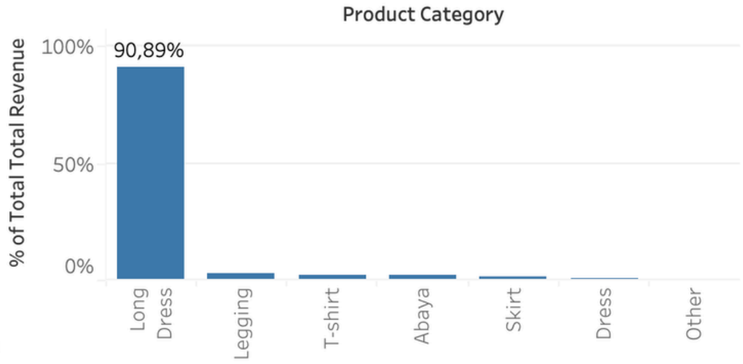
Top Revenue Channel



86,76%
livestreaming showcase

Live-streaming showcase dominates the revenue channels, indicating strong customer engagement and conversion through TikTok Live.

Top Category



'Long Dress' category leads overall performance.

KEY INSIGHTS

01.

- Significant fluctuations, reflecting unstable performance with alternating growth and decline phases
- Indicating promotions and seasonal behavior.

02.

- 21,3% cancellation rate indicates a relatively high order drop-off.
- Issues in customer commitment, product expectations, or operational factors such as fulfillment and delivery

03.

- Live-Streaming showcase contributes 86.76% of total revenue
- Customers strongly prefer interactive shopping experiences.

04.

- Long dress is the dominant product category, accounting for 90,89% of total sales
- Indicating a highly concentrated demand on this item and strong customer preference for modest fashion styles.

KEY INSIGHTS

05.

Most buyers are concentrated in East Java, indicating a strong regional demand and a key market focus for targeted growth and retention strategies.

RECOMMENDATION

- Enhance promotional strategies to improve customer acquisition and engagement
- Expand product variety to better meet diverse customer preferences
- Participate in TikTok campaign to increase visibility and reach wider audience
- Leverage TikTok Ads to optimize algorithm exposure and attract new customers from different regions
- Build customers trust to reduce cancel rate by enhancing communication and support
